

COVID -19 Survey Summary – BC Residents – April vs. June Results

Q1 PRIMARY RESIDENCE

Answered: 590 Skipped: 0

- 5% fewer respondents are working in a different location (from home, alternate office, etc.)
- 1.5% more people have been permanently laid off
- 17% average increase in work volume – respondents now report slightly higher average work volume than pre-COVID-19 times
- Priorities remain the same: respondents want more online professional educational events, opportunities for networking and sharing best practices, and support and resources from their Associations with employment and mental health/wellbeing

New Comments/Requests:

-Respondents want advocacy for equity, justice, and reconciliation within the profession and support for Black and Indigenous members and associates

-Respondents want to know how others are making decisions about work location and safety, best practices during COVID-19, and how COVID-19 is impacting others' work and wellbeing
