

## Presentation & Open House - BC Green Roof Nursery Visit on Vancouver Island

BC Green Roof welcomes BCSLA members to join our idea sharing presentation, during which we will provide unbiased in-depth details on how green roofs work, common misunderstandings and much more.

Kevin Kersten from BC Green Roof has worked in the industry for over 25 years, with an annual project portfolio surpassing twice the Vancouver convention centre's roof and is an all-round expert in the field. He is not linked with any specific manufacturer or supplier. His detailed knowledge and recommendations are backed by scientific methodology, such as thermal-dynamics and hydrology.

With the strongly held belief that advancements lay in evaluating the past, BC Green Roof constantly seeks for improvement, is extensively involved in R&D and is an avid believer in sourcing components locally, such as the locally developed and produced edge restraints and insulated inspection chambers ([www.greenleed.ca](http://www.greenleed.ca)) that otherwise would have to be shipped in from thousands of km away.

In case you cannot make it, yet are interested in the subject, please contact us directly to set up a separate meeting in your office, at your project, or on our nursery field.

**When:** Thursday, July 12, 2018 from 1pm – 4:30pm we would like to welcome you

**Where:** Shawnigan Lake Community Centre for a presentation, (2804 Shawnigan Lake Rd)  
after that we would welcome you to our nursery:  
2569 Lavinia Rd, Shawnigan Lake -- (1.5km from community centre)

**Features:**

- Sedum Vegetation mats (15,000sf) grown without the use of chemical fertilizers
- Locally produced edge restraints and insulated inspection chambers ([www.greenleed.ca](http://www.greenleed.ca))
- Our expertise available to you
- Several sample green roofs

To register to confirm your attendance, please email Kevin at: [info@bcgreenroof.ca](mailto:info@bcgreenroof.ca)

Knowing that some are interested in features in the private gardens, visitors are welcome to visit the large natural swimming pond. <https://outdoor-living.weebly.com/>

The gardens came about with enjoyment in mind, yet constraint by time, local conditions and in all fairness, budget. We are constant changing and expanding and they more so prove a concept, where elements are changed out over the years, replaced by more durable materials.
