

Intermediate Landscape Architect

Providing sustainable and ecological planning and landscape architecture services for neighborhoods, communities and regions, our Planning and Landscape Architecture group is comprised of collaborative, creative, and visionary professionals who create high-quality and sustainable environments that are functional, innovative, appropriate and attractive. This is where great people and great ideas truly make a difference.

An opportunity exists for a highly motivated and enthusiastic Intermediate Landscape Architect in the Saskatoon office location. This position is ideal for those candidates wanting to assume a greater responsibility for project management in the short term and overall team management in the long term. The successful candidate will work in a fast paced, multi-disciplinary team environment working on a variety of private and public landscape architectural projects including municipal parks and open spaces within new subdivisions, storm water ponds, urban design/streetscaping, river valley restoration and trail development.

Responsibilities:

Your responsibilities will include master planning, landscape concept and detail design development, construction detailing, schematic illustrations and presentation of the design work to the public, stakeholder groups and our clients. Reporting to a Senior Landscape Architect, you will also provide cost estimating, detail design services, contract document preparation, tender and contract administration services including inspection and construction management for total project involvement.

Qualifications:

The ideal candidate will possess the following:

- Degree in Landscape Architecture (BLA or MLA) and/or eligibility to become a member of the Saskatchewan Association of Landscape Architects;
- Minimum 5 years work experience is preferred;
- Superior grading and planting design skills are required, with an understanding of the Landscape Architect's role in a consulting environment;
- Hand drafting and graphic design skills are highly desirable;
- Ability to work independently and as part of a team;
- Possess a strong desire to take part in finding creative solutions that are environmentally responsible and technically sound;
- Microsoft Word, Excel, and AutoCAD experience is required;
- PowerPoint and Adobe Photoshop experience considered an asset;
- Excellent presentation and oral/written communication skills are desirable;
- A valid driver's license is required for site/project meetings and inspections (mostly in the Saskatoon area);

We offer all candidates the opportunity to challenge their abilities in a dynamic work environment and your efforts will be recognized through a competitive compensation program. Interested and qualified candidates should submit their resume and cover letter, online at www.stantec.com/careers.

Committed to the principles of Employment Equity, we thank all candidates; however, only those selected for an interview will be contacted.
