

# EULISES ORTEGA

## LANDSCAPE DESIGNER

On my career I had the opportunity to work on several projects increasing my knowledge over time and the scale of projects. At the beginning, I designed the landscape of a small houses in a local nursery and then a larges mansions in a landscape firm. I worked during design and supervision of landscaping in many sizes of malls, vertical buildings, and mixed uses. Also in one of the companies were I worked, I collaborated with the help of local Universities in the creation of districts where streets, trees, crosses and neighboring parks were intervened as support to nearby communities, I find that work very amazing and change my way of seeing landscape architecture and the impact can have on people.

## PROFILE AND SKILLS

I received the title of Architect, but from my beginning I was interested in the landscape, that's how I decided to take a diploma and learn more about it while I worked in a nursery. When I finished the diploma I take a work in a landscape architect firm where I was a designer; on my last job I developed as the design area and then as a one of the heads of construction documents having here people under my charge. Here in Canada I am looking for the opportunity to learn and be able to continue developing in the areas of design, construction documents or supervision.

Principal software domain:

Autocad		Office	
Sketch up		Photoshop	
Revit		IN Design
